

# Selectboard March 25<sup>th</sup> @ 8am

Attendance John Ogden, Steve Hall, Chrystal Cleary, Lori Langevin, Michael Jeffery

Call to order 8:07am

- Previous meetings minutes approved
- Pay orders were signed
- discussion of the "Sandbox Project"- separating the land purchase from the structure determination would make this more do-able and flexible.
- Roads were doing well but are beginning to soften. With Rain coming and temps in the 60's, Steve anticipates some grading and gravel shoring up forthcoming.
- John and Steve shared preliminary drawings for a 4 acre subdivision from a possible property to purchase for the SandBox, and have received a proposal from a company that builds sand sheds, with accompanying photos. To begin, the plan would be to build an access road, the sand shelter, run electricity and a well pump (but no wastewater), and a probably concrete pad to the diesel tank and pump (currently at Karl Pfister's but would move on site).

Michael will set up a meeting of the Sandbox committee for this coming Monday or Tuesday, and to invite the landowner of the considered land.

Meeting adjourned at 8:54AM
