Town of Landgrove
Office of Zoning Administrator
88 Landgrove Rd.
Landgrove, VT 05148

Dear Zoning Board:

We would like to speak to our experience and longstanding relationship that we have had with Blue Flame Gas Co. Stratton Mountain Resort owns a propane facility with 3-30,000 gallon propane storage tanks, these tanks supply over 8 miles of underground gas main to a multitude of resort and private properties. The Resort also has many propane installations independent of this system. Blue Flame Gas operates, supplies and services this system and all propane installations for Stratton Mountain Resort.

With the large scope of the system, we are subject to many Federal and State laws and codes, which insure the safety of our customers, employees, as well as the general public. In operating our system Blue Flame and the facility are subject to periodic regulatory inspections. Blue Flame has always successfully met or exceeded the State and Federal safety inspections of the facility.

In our experience, safety and compliance is a top priority for Blue Flame and their employees. Anytime we have needed propane related help, they are willing and able to assist us. This includes assessing our systems, making recommendations for improved safety and compliance at the resort, as well as helping and training our employees on proper propane safety.

Having Blue Flame Gas operate our propane facility give us a great deal of confidence that our systems are safe, sound and compliant.

If you have any questions please do not hesitate to let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Cavagnino", written over a horizontal line.
